Janice Hammontre,
Vice President

Iva Norris,
Secretary

Auxiliary Address

P.O. Box 432
Dobbins, CA 95935

I am pleased to announce as of July 1st the Dobbins/Oregon House Fire Department has a new substation located at 12529 Rices Crossing with complete firefighting capabilities. This has been made possible by the joint efforts of the DOHFPD, the people of the Fire Auxiliary, the Fellowship of Friends, the donation of a fire engine by an individual in our community and others too numerous to mention. This joint effort by our community is an example of people working together for the benefit of everyone.

The firefighters are now able to respond more quickly to a fire threat and have expanded fire suppression capabilities. To date they have used this engine on three separate fires.

An added benefit of the new substation will be reduced insurance costs for some of our residents. Properties within 5 road miles from this recognized fire substation will have an ISO rating of 6Y (formerly classified as 8B). Contact your insurance company if you think this might apply to you.

A brief note about ISO rating; this is an Insured Services Office Public Protection Classification (ISO), which rates the fire suppression delivery system in your community and/or residences. They have revised the classification but the criteria for the classification is still the same. For example property formerly rated at 8B is now a 6Y but the basic classification has not changed. I will email anyone interested the full letter received from OPP regarding the classification changes.
